

The background is a dark blue field filled with various line-art icons in light blue, yellow, and red. These include: a satellite in the top right, a speech bubble with 'HTML5' in the top left, a speech bubble with 'JS' in the top center, a speech bubble with binary code '01101000' and '01101001' in the top left, a Python logo in the center, a speech bubble with '>' in the top left, a computer monitor and tower in the middle left, a globe in the middle left, a keyboard in the middle, a Wi-Fi symbol in the bottom left, a magnifying glass in the bottom left, a group of stylized people at the bottom, two interlocking gears in the bottom right, and another satellite in the bottom right. The text is centered within a white rectangular box.

Overview:

Table:

All exercises			
Exercise	Levels	Concepts	Blocks Used
Dog and the loops	8/8	Loops, Variables, Functions	350
Swamp conditionals	4/4	Conditional Statements, Loops, Variables, Sequence, Events, Functions, Decomposition, Algorithmic Thinking	79
Predator bird functions	7/7	Conditional Statements, Loops, Variables, Sequence, Events, Functions, Decomposition, Algorithmic Thinking	225
Functions on the field	9/9	Conditional Statements, Loops, Variables, Sequence, Events, Functions, Decomposition, Algorithmic Thinking	294
Fun with Basics	3/3	Sequence, Algorithmic Thinking	44

List of Concepts:

Decomposition

Breaking down a problem into smaller, more manageable parts.

Computational Thinking Concepts

Pattern Recognition

Identifying similarities or patterns within problems.

Computational Thinking Concepts

Abstraction

Simplifying complex problems by focusing on essential details and ignoring unnecessary information.

Computational Thinking Concepts

Algorithmic Thinking

Developing step-by-step instructions or rules to solve a problem.

Computational Thinking Concepts

Sequence

Understanding and writing instructions in a specific order.

Programming Concepts

Variables

Introducing the concept of containers for storing information.

Programming Concepts

Loops

Repeating a set of instructions multiple times.

Programming Concepts

Conditional Statements

Making decisions in the program based on certain conditions.

Programming Concepts

Events

Reacting to user inputs or specific occurrences in the program.

Programming Concepts

Functions

Creating reusable blocks of code to perform specific tasks.

Data Types

Introducing the idea of different types of data, such as numbers, text, and Boolean values.

Input and Output

Understanding how programs receive information (input) and produce results (output).

Debugging

Identifying and fixing errors or mistakes in the code.

Comments

Adding explanations and notes within the code for better understanding.

Event Handling

Responding to events triggered by user actions or other parts of the program.

Graphics and Animation

Introducing basic concepts of drawing and creating movement in a program.

Simulation

Creating virtual scenarios to model real-world situations.

Collaboration

Encouraging teamwork and sharing of code with others.

Iteration

Repeating a set of instructions or a process.
